MULTIFILL SMALTO 1-8 mm

Colored, polymer-modified, cement-based tile grout with porcelain effect.

Thanks to its high water-repellence and the special bacteriostatic agents it contains, it is ideal for areas with intense moisture such as bathrooms, kitchens etc. It offers a smooth and glossy final surface that can be easily cleaned, as well as a superb color stability.

It is available in 34 colors and suitable for joint width of 1-8 mm.

Package: 4 kg

MULTIFILL RAPID 1-8 mm

Rapid-setting, polymer-modified, cement-based tile grout with porcelain effect.

It is ideal in cases where the floor or wall must be delivered fast for use, e.g. professional areas etc. It provides high mechanical strength, superb color stability, high water repellence and antibacterial action. It gives a smooth and glossy final surface that can be easily cleaned.

It is available in 8 colors and suitable for joint width of 1-8 mm.

Package: 4 kg

MULTIFILL MARBLE 0-3 mm

Colored, fine-grained, polymer-modified, cement-based grout.

It offers high mechanical strength, superb color stability and great water-repellence. It is used for grouting marbles, granites, tiles, glass and marble mosaic, on walls or floors, indoor or outdoor.

It is available in 5 colors and suitable for joint width of 0-3 mm.

MULTIFILL EPOXY GLITTER

Three-component decorative, solvent-free epoxy grout.

It offers all the properties of an epoxy grout such as high mechanical and chemical resistance and waterproofing. With the addition of metallic aggregates, a colored decorative grout with particular aesthetic effect is created. It is ideally combined with glass mosaic tiles. It is suitable for the creation of decorating surfaces in spaces such as clubs, hotels, bathrooms with particular design etc.

The metallic aggregates are available in 10 colors.

Package: 2 kg (A+B)

Package: 200 gr

MULTIFILL EPOXY

- THIXO
- FLOW

Two-component solvent-free epoxy grout.

It is ideal for areas where high mechanical and chemical resistance is required and also for surfaces that come in direct contact with food products (W-347, EPA 330.5 and EPA 110.2). It offers high compressive and flexural strength, waterproofing, excellent adhesion and high resistance to several acids, alkalis, cleaning agents, etc. It is available in 5 colors and suitable for joint width of 1.5-12.0 mm.

Available in 2 types:

MULTIFILL EPOXY THIXO, for pointing wall and floor tile joints, in 5 colors.

MULTIFILL EPOXY FLOW, because of its fluidity, it is suitable for pointing floor tile joints, in light grey.
